

What's Going on Here?

You might say that there was a fire, or that someone took a torch to the device (which they did), or that this is a poor wiring job (which it also is). What we say is that the *PolyGuard Series* UL Type 4X enclosure is continuing to protect the components contained inside. If you look closely you will see that the green power light remains illuminated, signifying that this product is working.

This photo was submitted by Click2Enter, Inc*, manufacturer of the C2E-I Emergency Gate Access Control Product. Their product gets installed in some pretty tough environments, including the US-Mexico Border Fence. They can't have failures, and neither can you.

For more information about Enclosure Solutions, Inc. and the *PolyGuard Series* of electrical enclosures, call us at 1-216-772-2930 or log on to www.enclosure-solutions.com to find your local manufacturer's representative. They will be happy to answer any questions you have or to discuss your application.
